Race

Parametric Equation

☆ of rose curve

$$x = a \cos(k\theta) \cos(\theta)$$

$$y = a \cos(k\theta) \sin(\theta)$$

No. of the petals = n

If $k = \text{odd}$

then, $n = k$

If $k = \text{even}$

then, $n = 2k$

Maurer Rose
 $(r, \theta) = (a \sin(nK), K)$
 $K = 0, d, 2d, \dots, 360d$
 d is a positive integer

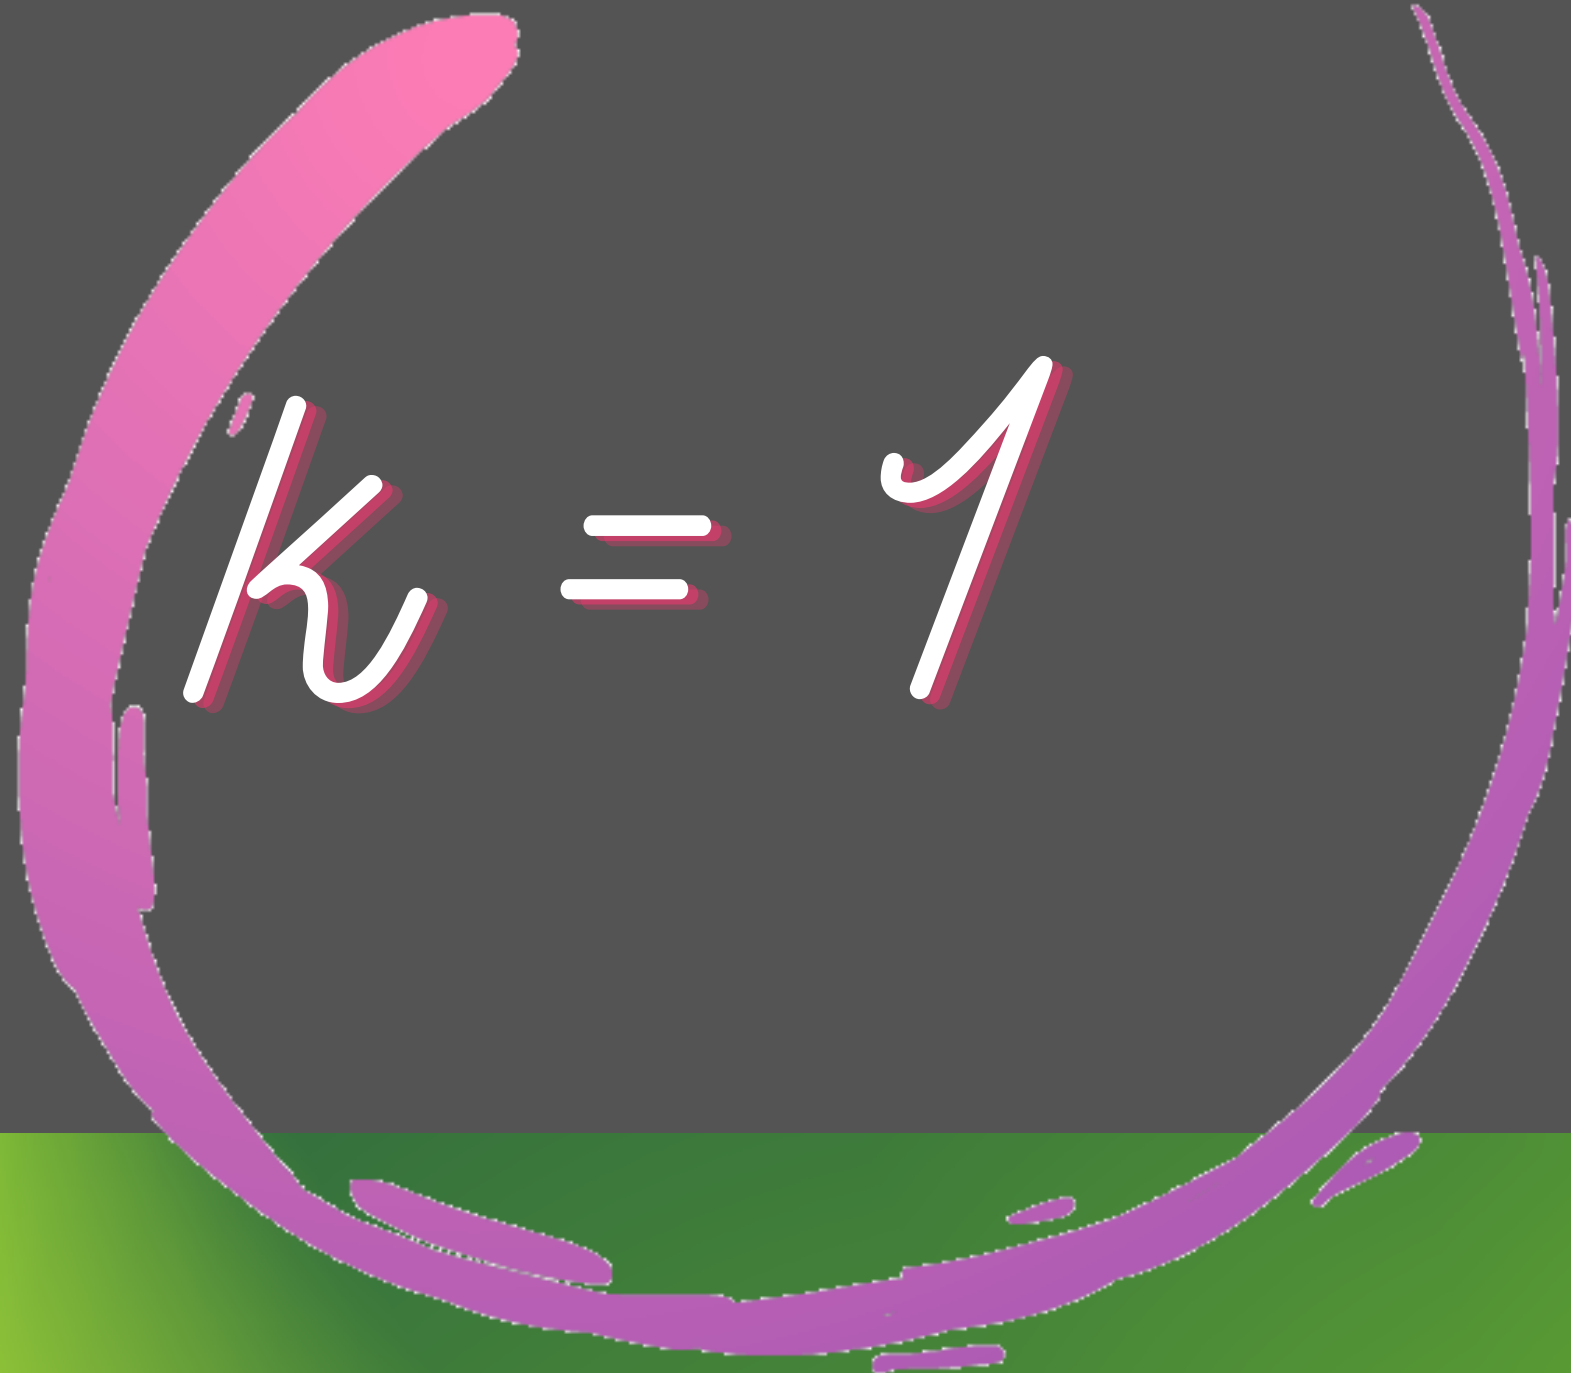

*Just connect those 361
points and that's it*

Maurer Races

*Enough of
formulas. Enjoy
the roses now.*

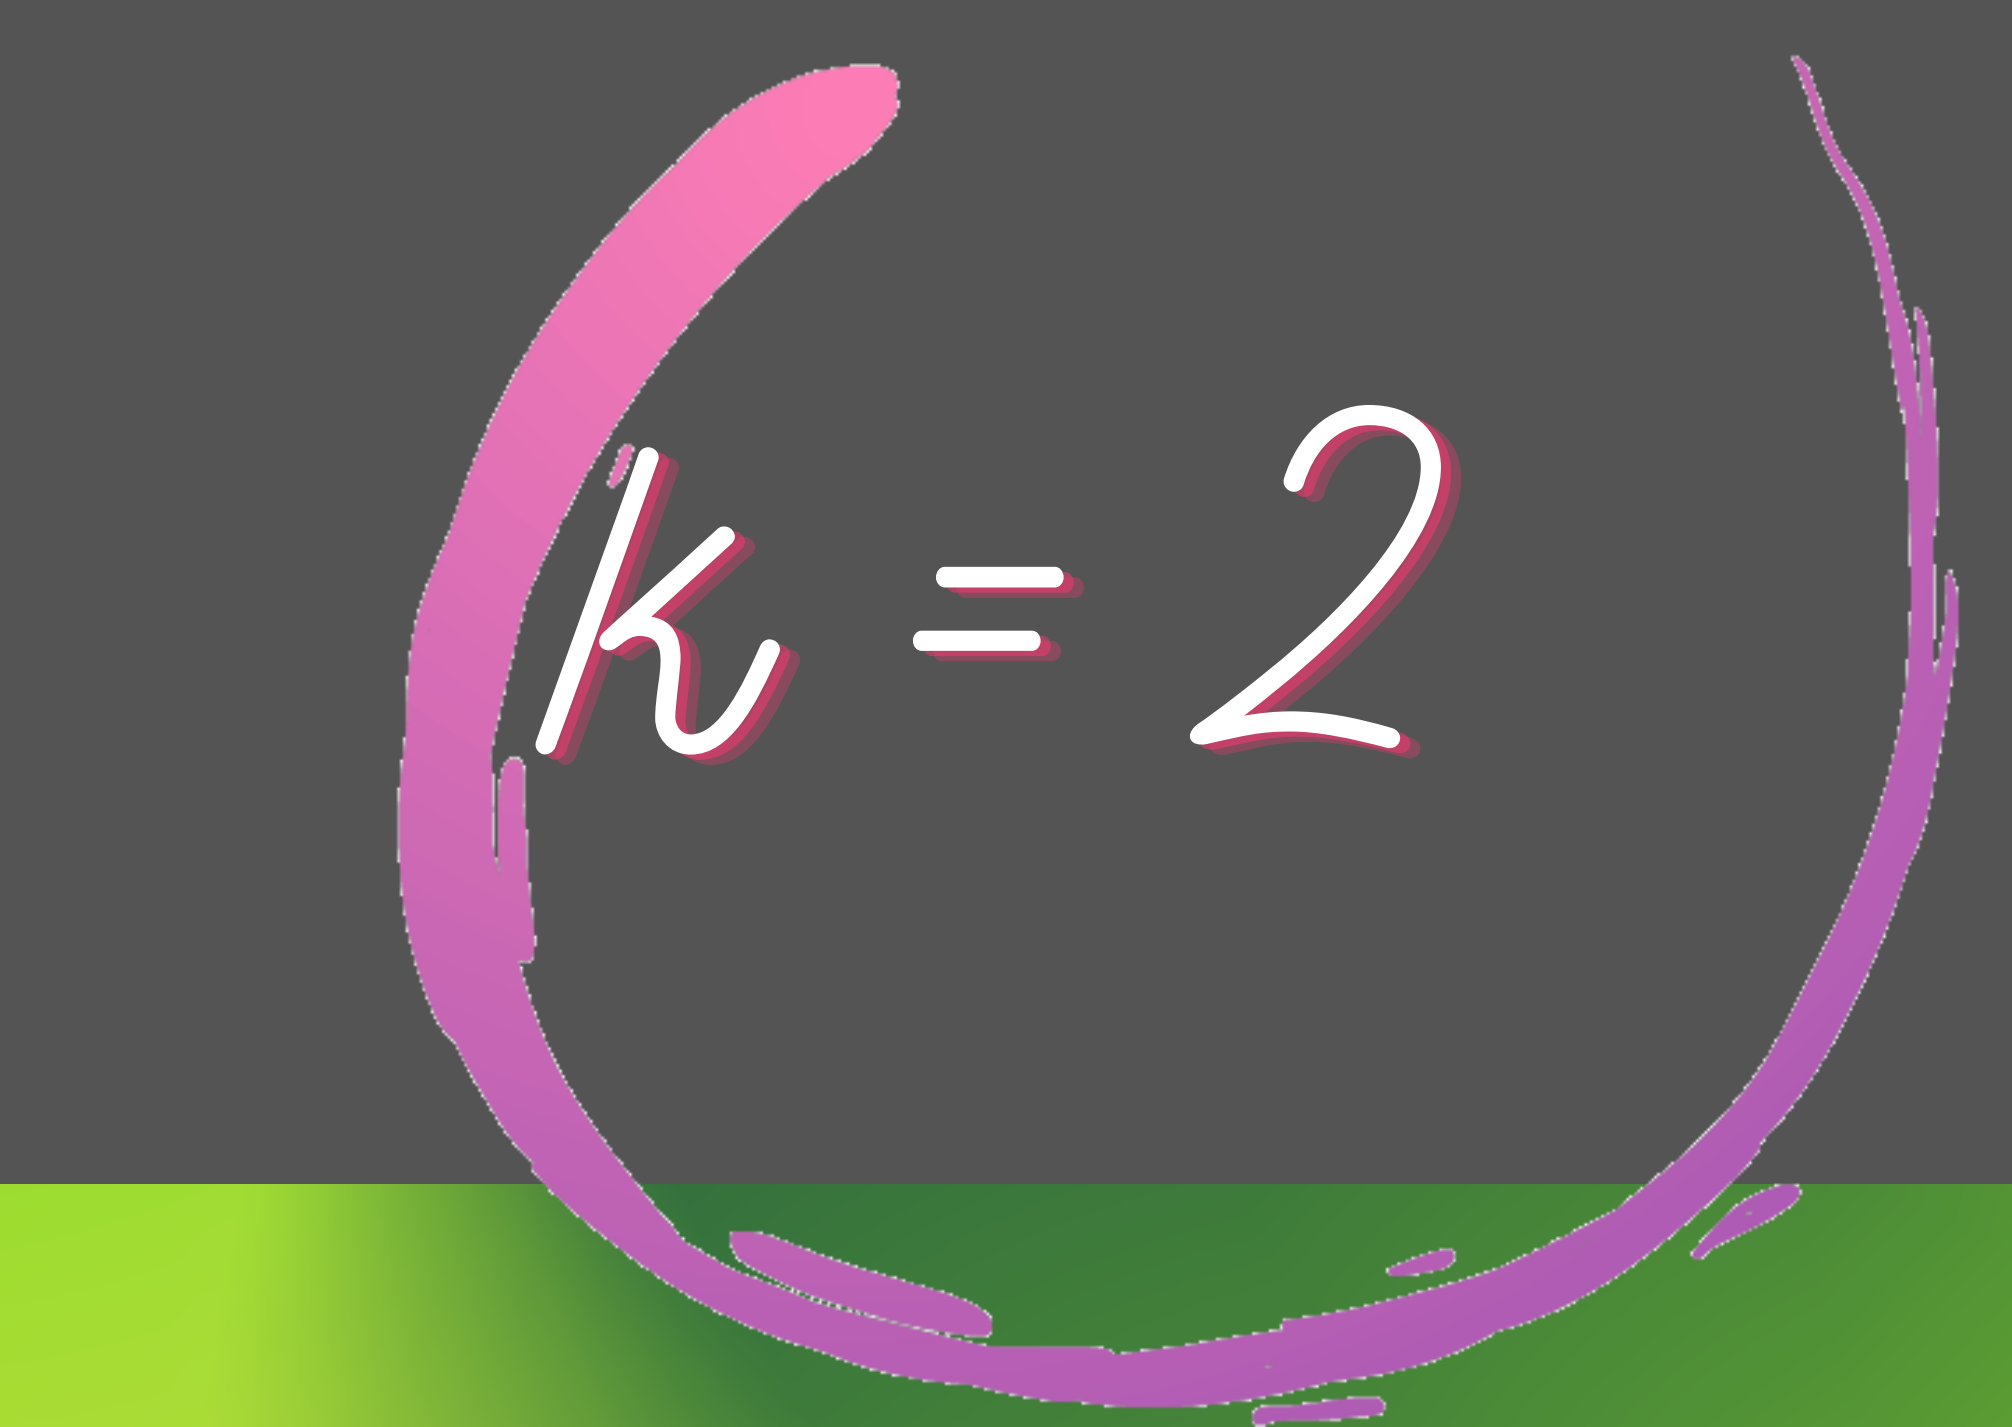

$k = 1$

k = 1

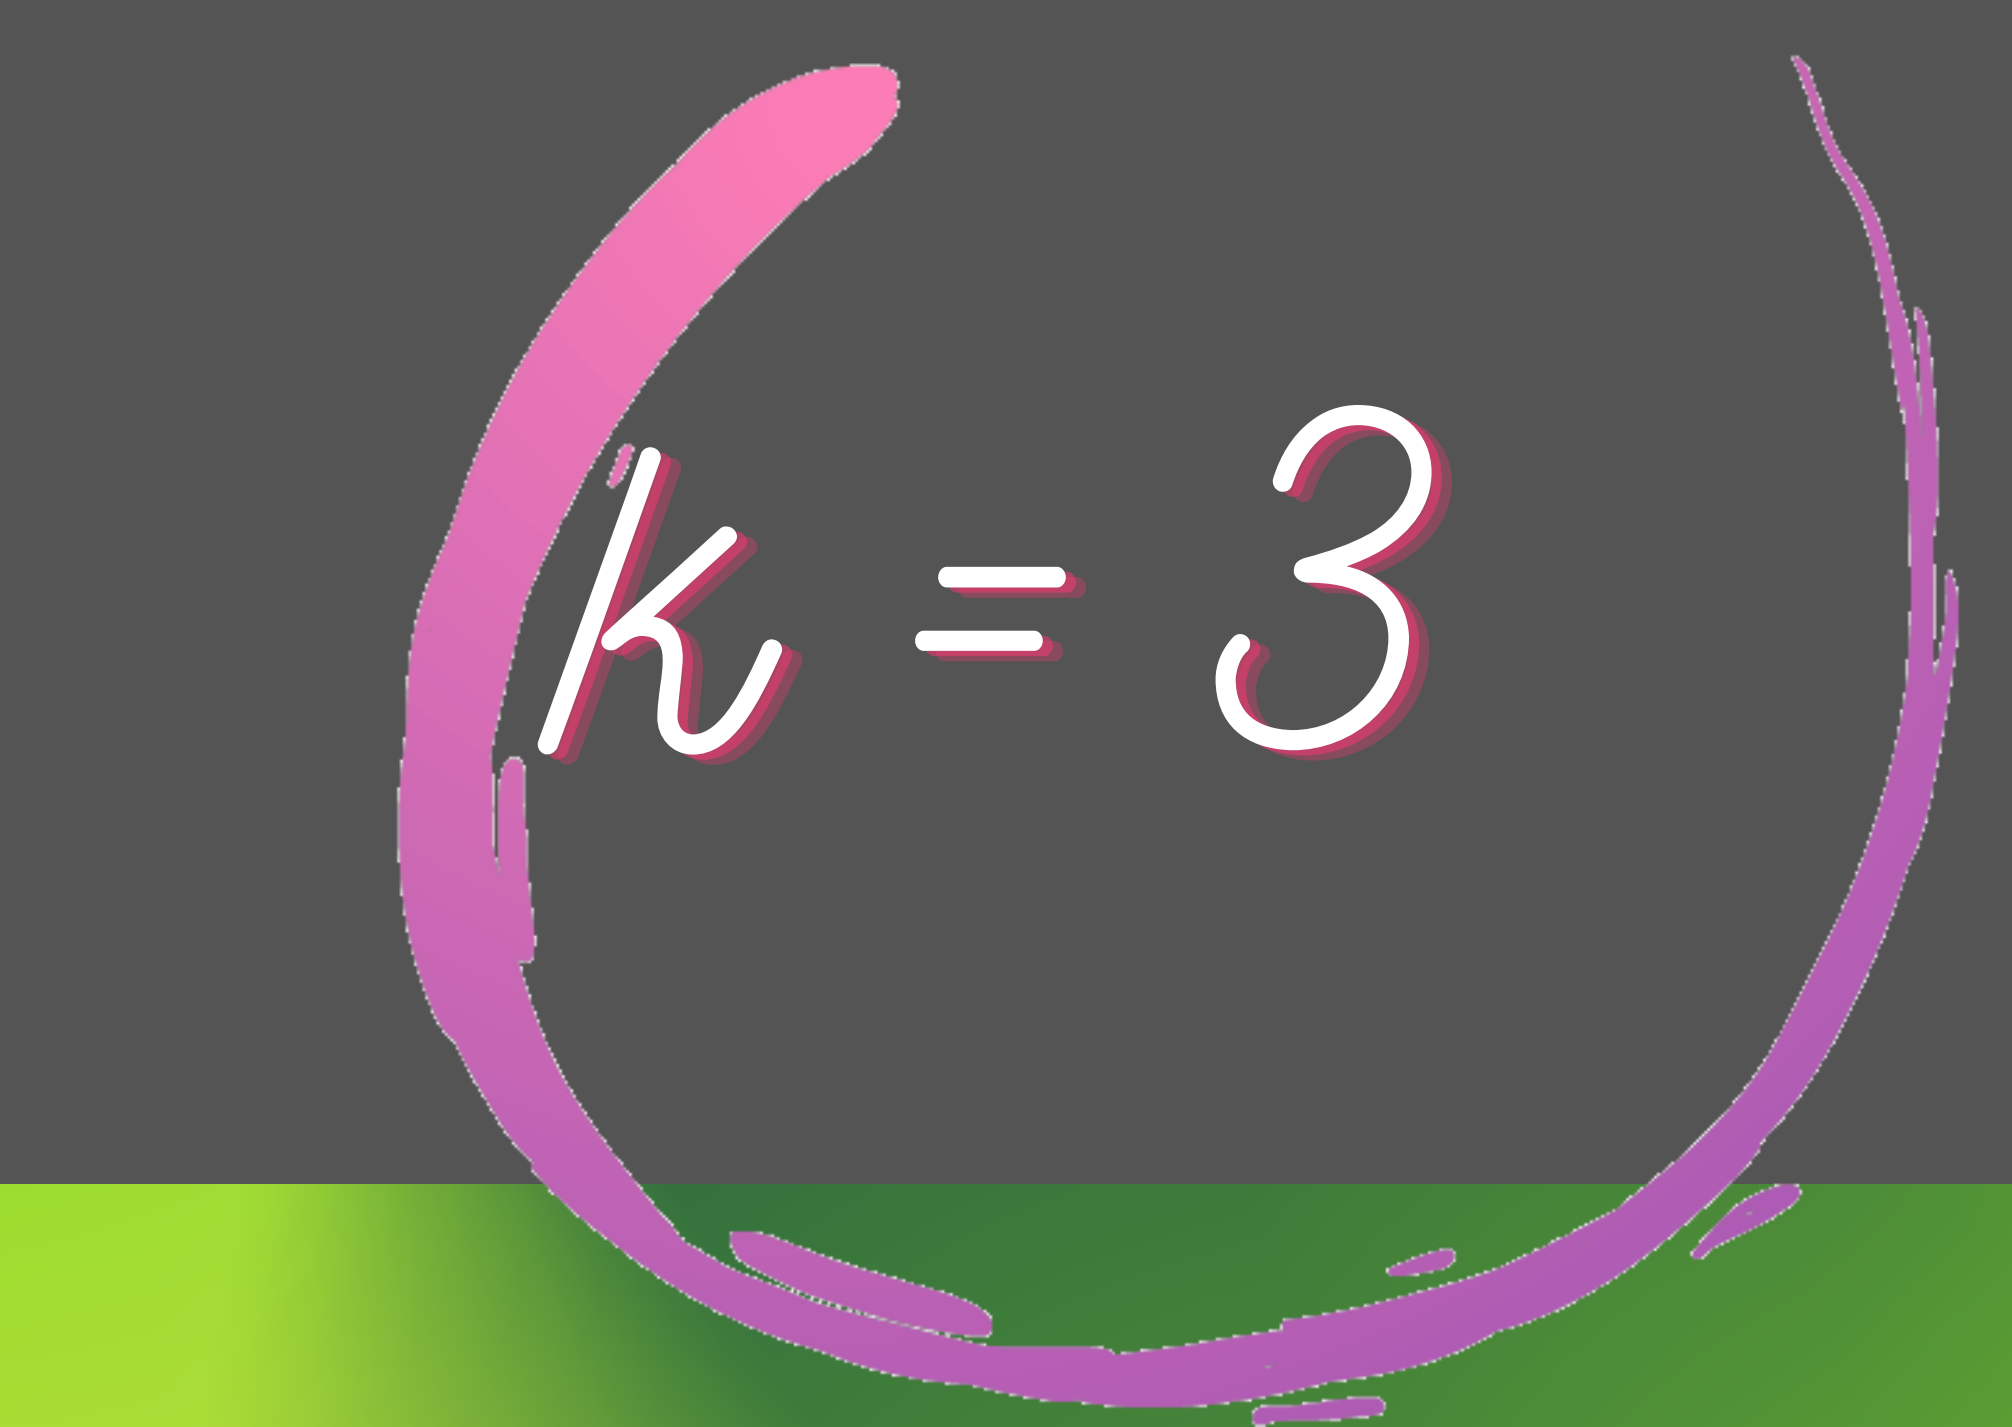

*Wait Little more Roses
are on the way*

$$k = 2$$

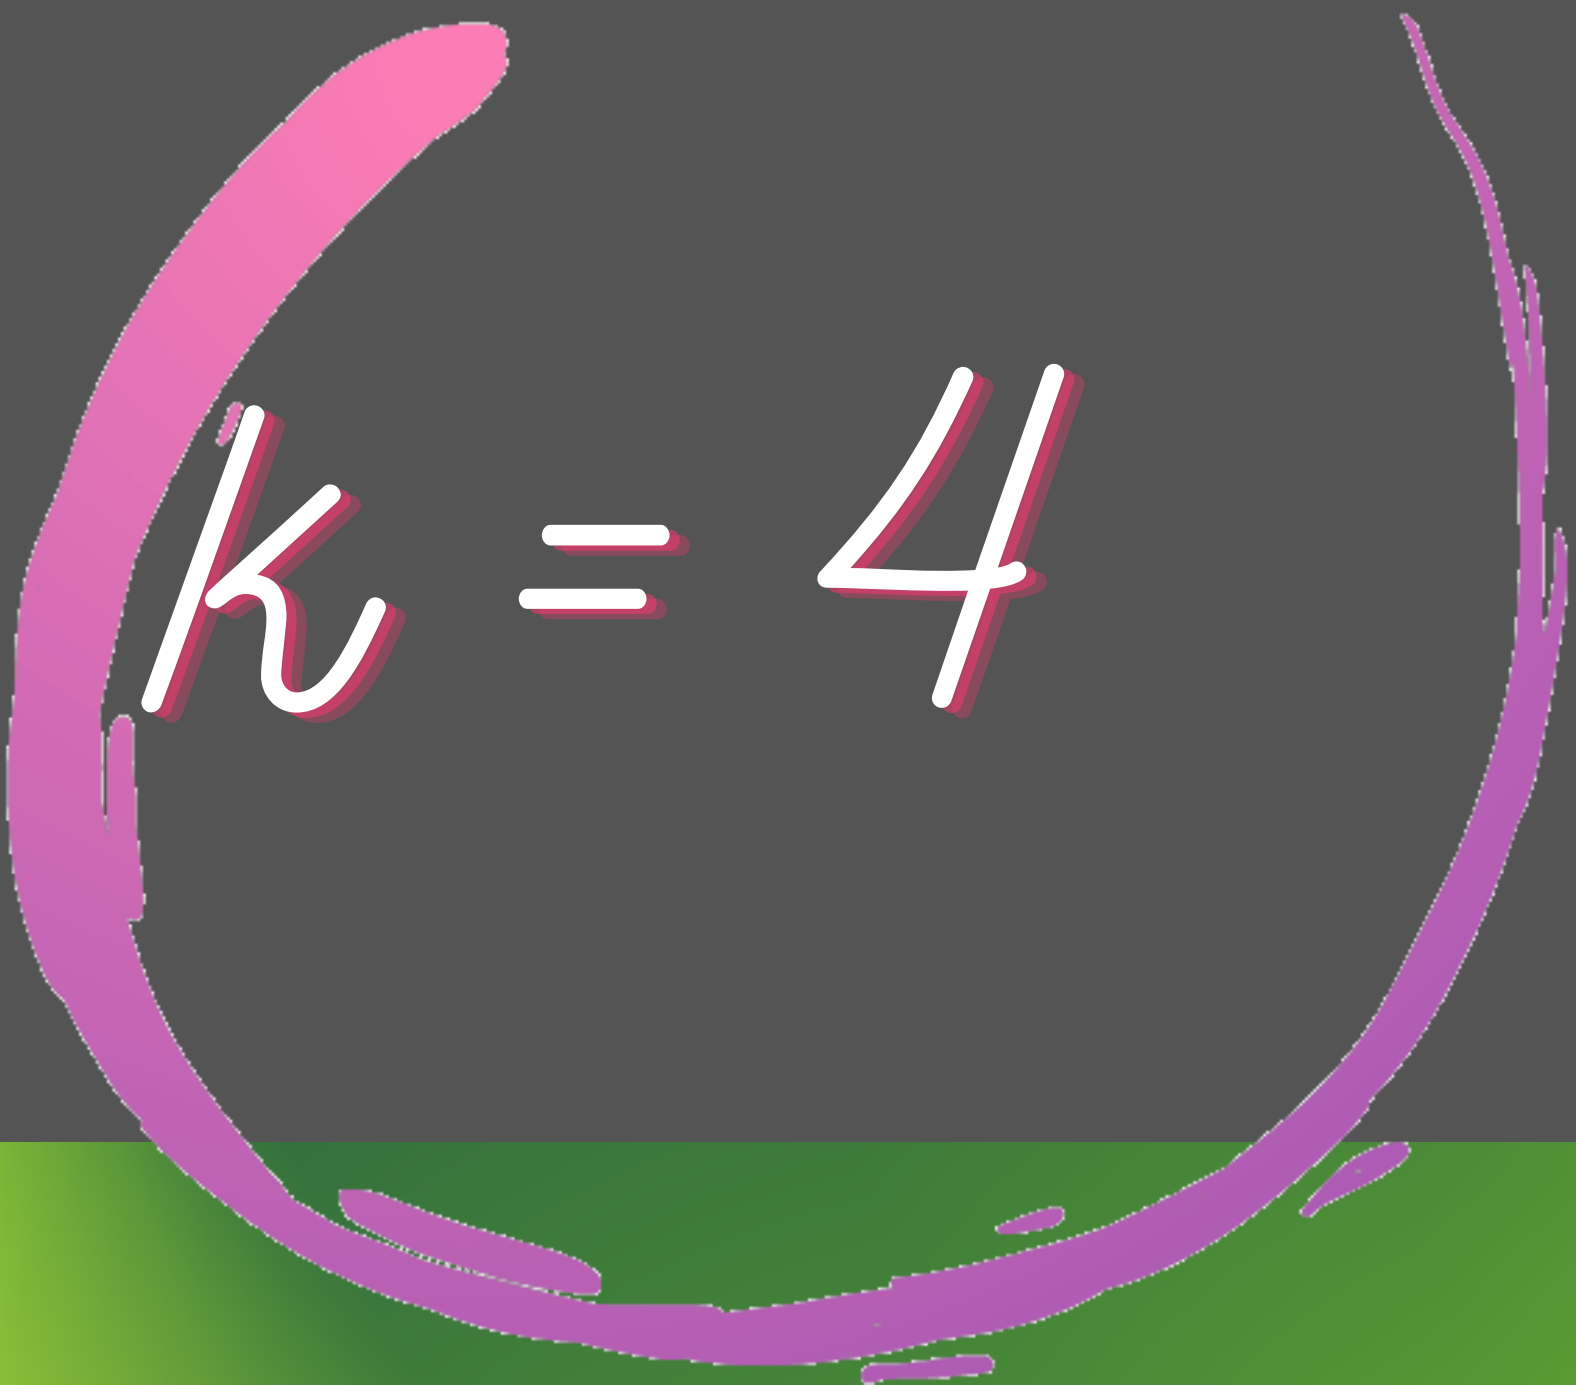

$$k = 2$$

$$k = 3$$

$$k = 3$$

$$k = 4$$

$$k = 4$$

$$k = 5$$

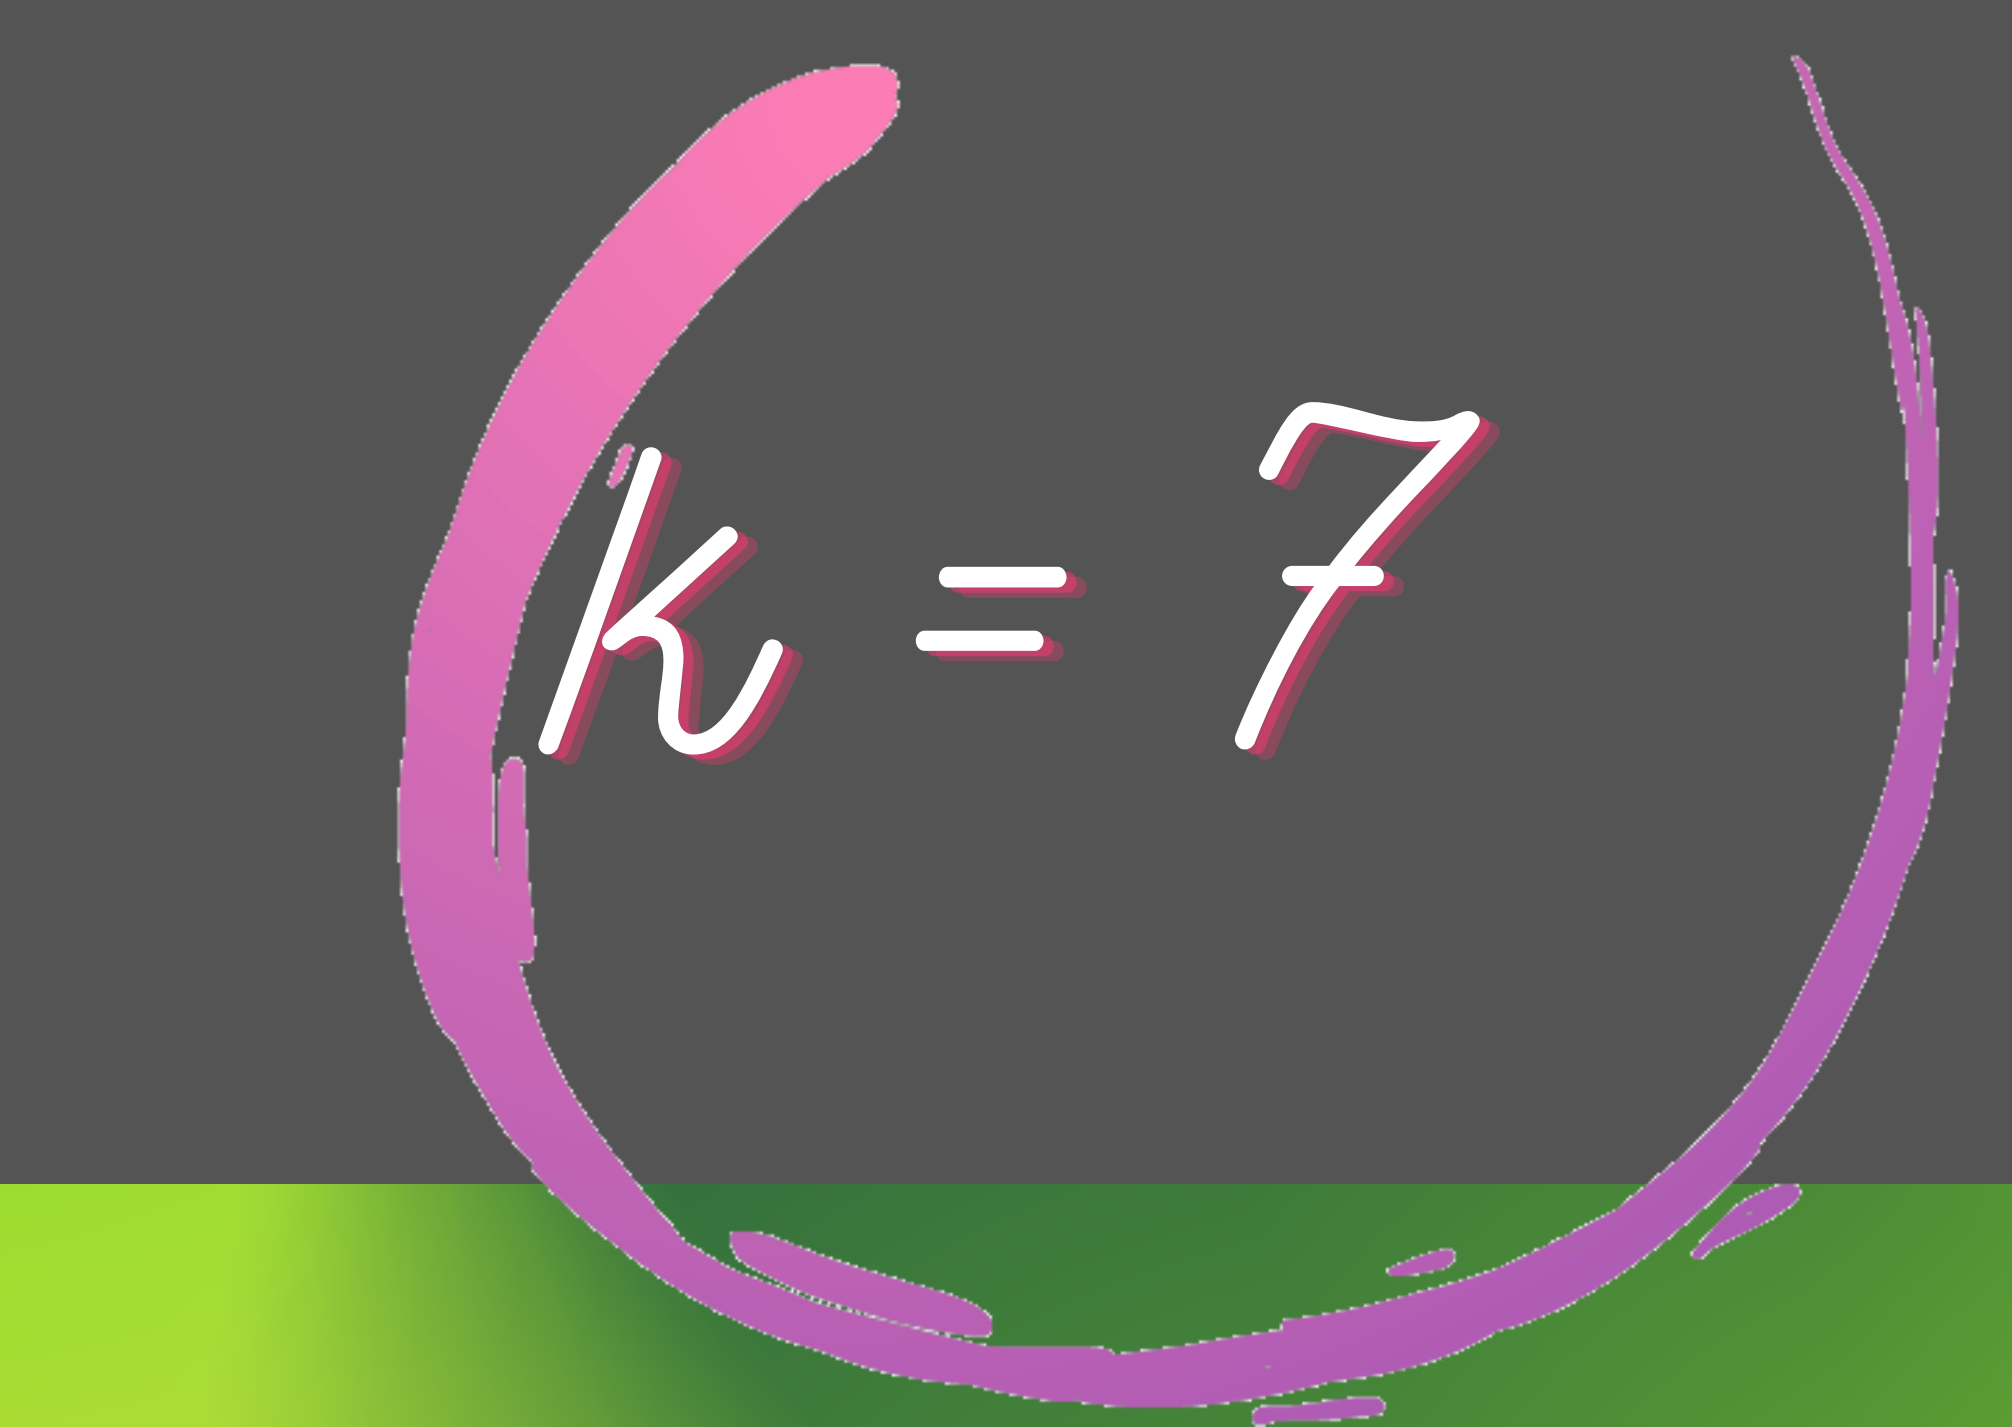

$k = 5$

$$\kappa = 6$$

$k = 6$

$$k = 7$$

$k = 7$

$$\kappa = 8$$

$k = 8$

*Thank
You for
watching*
